When you are alone...

Use the time to document your thoughts on your phone.

Always admire...

People that look good after they retire.

Don't wait for a compliment...

If need be you can praise yourself.

Never be inconsiderable...

Practice to be reasonable.

While you take walks...

Practice positive thoughts.

Believing everything you hear...

Installs fear.

In your own defense ...

You must understand common sense.

Avoid conflicts...

By staying out of politics.

Accept...

that not everything is perfect.

Remember good things...

And the happiness it brings.

To Be Continued...
